hydraflo

VORTEX-PRO3 · WHOLE-HOME FILTRATION

Better Water.
Everywhere.

Australia's most robust whole-home filter system — engineered for the toughest water, architecturally designed to suit the most considered homes. Installed and supported by Hydraflo.

0426 244 977

Transform the water to every tap in your home.

The Vortex-Pro3 — Australia's most robust whole-home filtration system, a 35kg stainless steel powerhouse. Engineered for Australia's toughest water conditions, it combines strength, design and world-leading filtration technology. The powder-coated stainless design with lockable front panel sets a new benchmark in durability and architectural style.

Inside, an advanced multi-stage cartridge design offers up to 9 stages of filtration, removing ultra-fine sediment, chlorine, chemicals, heavy metals, bacteria and pathogens down to 0.22 micron — protecting every tap in the home while improving taste, clarity and odour. Backed by a 10 year warranty and lifetime support from Hydraflo, the Vortex-Pro3 is not just a filter — it's a powerhouse of protection and performance.

0.22µm	9	10yr
FILTERED DOWN TO	STAGES OF FILTRATION	WARRANTY

Cleaner, safer water at every tap.

Multi-stage depth filtration that helps protect your family, appliances and plumbing across mains, tank and rainwater — down to 0.22 micron with the Hydro-Flow Filter Cartridge Kit.

01 **Bacteria & pathogens** E. coli · Crypto · Giardia	02 **PFAS & PFOA** Pesticides · herbicides · forever chemicals	03 **Taste & odour** Clearer, fresher water
04 **Heavy metals** Lead · cadmium · carcinogens	05 **Chlorine & THM** DBP · up to 98% reduction	06 **Sediment** Silt · dirt · rust
07 **Anti-scale option** Protects bore & town water	08 **Chemical reduction** Protects bore & town water	09 **Down to 0.22µm** Mains · tank · rainwater

Preserves calcium & magnesium

No bottled water required

Three cartridges. Nine stages.

The **Hydro-Flow Filter Cartridge Kit** is the advanced mains-water configuration for the Vortex-Pro3. Behind the key-lock front, three full-size 20 × 4.5" housings run the treatment train in sequence — sediment removed first, primary chemical loading handled by a dedicated carbon cartridge, then final fine filtration and dual-carbon polishing — together delivering nine stages of protection for your family, appliances and plumbing.

STAGE	CARTRIDGE	FILTRATION LAYER	RATING	PURPOSE
1	Cartridge 1	**Outer sediment layer**	5 µm	Captures larger suspended particles — visible dirt, rust, scale fragments and coarse sediment.
2	Cartridge 1	**Intermediate sediment layer**	2.5 µm	Progressively captures smaller particles before they reach the inner filter structure.
3	Cartridge 1	**Fine sediment layer**	1 µm	Final sediment polishing — protects both downstream carbon cartridges from fouling.
4	Cartridge 2	**Sintered activated coconut carbon**	0.5 µm	Primary chemical reduction — chlorine, chloramine, taste, odour and organic contaminants.
5	Cartridge 3	**Hydro-Flow outer pleated layer**	Progressive	First high-surface-area layer, distributing flow and capturing remaining fine particulate.
6	Cartridge 3	**Hydro-Flow intermediate pleated layer**	Progressive	Additional fine filtration and contaminant holding capacity across the cartridge surface.
7	Cartridge 3	**Hydro-Flow fine pleated layer**	Nominal 0.22 µm	Final fine particulate and microplastic reduction layer before the internal carbon cores.
8	Cartridge 3	**First activated carbon core**	Approx. 5 µm	Second major adsorption zone — increased carbon contact for extended chemical reduction.
9	Cartridge 3	**Second activated carbon core**	Approx. 1 µm	Final internal carbon polishing for finished-water taste, odour and residual chemicals.

CARTRIDGE 1 · STAGES 1–3

Progressive Grooved Sediment

5 → 2.5 → 1 µm

CARTRIDGE 2 · STAGE 4

Sintered Coconut Carbon

0.5 µm

CARTRIDGE 3 · STAGES 5–9

Hydro-Flow Dual Carbon

Nominal 0.22 µm

CHLORINE REDUCTION

Up to **99%**

less chlorine at every tap.

In just one hot shower, your body can absorb as much chlorine as drinking up to 10 glasses of unfiltered water — through your skin. Whole-home filtration from Hydraflo helps protect every tap, every shower, every day.

Softer on skin · Kinder to hair

Built to a higher standard.

Up to nine stages of filtration in one stainless-steel system — engineered for Australia's toughest mains, tank and bore water, and independently certified to AS 3497:2021.

- Targets E. coli, Cryptosporidium & Giardia with the Hydro-Flow 0.22µm kit
- Reduces chlorine, chloramine, fluoride, PFAS & PFOA
- Anti-scale protection for bore & town water
- Pre-assembled for quick 'plug & play' install

Dimensions H×W×D	**752 × 595 × 212 mm**
Weight	**35 kg**
Housings	**3 × 20 × 4.5"**
Inlet / Outlet	**25mm BSP · lead-free brass**
Seal	**Dual O-ring · compression**

Pressure	**175–800 kPa (PLV > 800)**
Max temperature	**0–38°C · cold line**
Filtration	**Up to 9 stages · to 0.22µm[1]**
Warranty	**10 years**
Certified	**AS 3497:2021 · WaterMark · CMI 080113**

hydraflo.com.au

This is what your filters catch.

Used cartridges after twelve months in service, beside a fresh set. The discolouration is sediment, rust and organic matter that would otherwise have reached your taps. A new set goes in at every annual filter change.

12 months	Hydro-Flow kit	$440 incl. GST
REPLACED EVERY	GENUINE CARTRIDGES	ANNUAL FILTER CHANGE

Specify the Hydraflo Vortex-Pro3.

Whole-home filtration engineered for the toughest water, professionally installed by a licensed plumber and backed by a ten-year warranty and lifetime support. 100% Australian owned and supported.

FULLY INSTALLED

$3,500 incl. GST

Most installs. Supply & licensed plumber install. Concrete cutting or pipe locating, if required, is quoted upfront, before any work starts or your system is ordered. No hidden costs.
